

## Accel Partners - Web Support, Custom Applications

Accel Partners is a leading Silicon Valley venture capital firm focusing on early-stage investments and investing in such well-known companies as Facebook, BitTorrent, and Real Networks.

Accel, which prides itself on leading the pack in venture investment, was looking for a highly-responsive and reliable Web development partner that wouldn't hold it back. Enter Dayspring.

Accel initially came to Dayspring for assistance with a simple project—enhancing a Flash animation kiosk display which features their venture investments. Over the years our relationship has expanded, with Dayspring assuming responsibilities for maintaining and enhancing the Accel website and developing custom Web applications that support its core business of venture investment.

### Dayspring's work for Accel includes:

- Flash animation and programming for kiosk-style displays used at the World Economic Forum
- Content management tool-building and maintenance for Accel's website
- Website design refresh
- Custom web application development for internal venture target analysis

### Technologies employed:

PHP, MySQL, Flash, Facebook API
